Git and GitHub, VS Code, XAMPP, phpMyAdmin

Netlify, GitHub Pages

MS Office, Google Workspace

ALSO

Good written and spoken English

5 years working remotely

Careful with details

Picks up new tools quickly

MAYJHON V. GABUNADA

Web Developer | Data Analyst

ABOUT ME

I'm an entry-level web developer and data analyst from Cebu. I build web apps with PHP/MySQL, Laravel, and Next.js, and most of my projects are live or on GitHub, so you can try them yourself. Before I moved into development, I spent five years as a Data Encoder for U.S. clients. That job taught me to be careful with details and to work well on my own from home. I'm looking for a junior developer role where I can learn from a team and help out from the start.

PROJECTS

Mini CMS Workflow | PHP, MySQL, Bootstrap

github.com/mgabunad/mini-cms-workflow

- A content system for an agency with several clients. Staff write drafts, clients approve them, and editors publish them.
- Built the login, user roles, permissions stored in the database, and a simple invoicing page, all in plain PHP without a framework.

Apartment Finder | Next.js, TypeScript, Supabase

apartment-finder-mgabunad.netlify.app

- A rental listing site in English and Dutch with search filters and an application form that saves to a database.
- Added a password-protected admin page for tracking applicants, and deployed the site on Netlify.

Laravel Admin Dashboard | Laravel, Blade, Tailwind

Capstone project

- An admin panel with login, role checks, product management, and a live search that updates as you type.

DPWH Flood Control Dashboard | Chart.js

- Turned a government Excel file into a 7-page dashboard with filters, summary numbers, and a project timeline.

Shopify and WordPress Stores | Shopify, Liquid, WooCommerce

- Set up two Shopify stores and wrote custom Liquid sections for them. Also built a WooCommerce shop from scratch.

WORK EXPERIENCE

Data Encoder (Work from Home) | Health Care Solutions Team

2020 – 2023

- Encoded and organized records for U.S. clients every day, working from home with little supervision.
- Kept my accuracy high on large volumes of data and flagged records that didn't look right.

Data Encoder | Callvation

2017 – 2019

- Encoded and checked client records while meeting daily targets.

EDUCATION AND TRAINING

Full Stack Web Development | CIIT College, Cebu

Graduated

- Front end, back end, JavaScript/jQuery, REST APIs, and Laravel.

Full Stack Data Analyst Training | ExcelHelpline.ph

2026, 3 months

- Data analysis, SQL/MySQL, Excel, Power BI, and Python.

BS Industrial Engineering | CIT University

2012 – 2016

CERTIFICATIONS

- Certified Professional Data Analyst (CPDA), ExcelHelpline, Aug 2026
- Python Programming Level 3, ExcelHelpline, Aug 2026
- Data Analytics Level 2: MySQL, ExcelHelpline, Jul 2026
- Data Analytics Level 1: Excel and Power BI, ExcelHelpline, Jun 2026
